Sechenova St, 6 • Kyiv • Ukraine

Objective: Junior Developer

Summary

Enthusiastic developer who is crazy about technologies using the latter as the main tool for turning ideas into and solving complex problems. Started with Python in working applications 4 years ago. Then jumped to C++. Have a few useful programs on Python.

Projects

[github](#)

Education

[Taras Shevchenko National University of Kyiv](#) (2016 - present)

BSc in Computer Science and Cybernetics (Department of Computer Science)

Main courses on OOP, algorithms, calculus, probability theory, linear algebra and others kind of math.

[Vinnytsia Physics and Mathematics Gymnasium №17](#) (2005 - 2016)

Emphasis on technical disciplines

Skills

Technical expertise: enthusiast with good knowledge of C++ language. Have experience in using socket technologies in C++. Know and understand the main concepts of OOP. Also have experience in UML (different types of diagrams), patterns and analysis XML (DOM, SAX, LINQ). Understand and often use main database structures to solve problem in the most optimal way.

Natural languages: Russian (*native*), Ukrainian(*native*), English (*pre intermediate-intermediate*).

Interests

Non-exhaustive list: I'm interested in way how the world works, programming, and how technologies can change our reality. Also I like analyse interesting startups and to rank its perspectives. I want to actively participate in the development of revolution technology and I am ready to learn a lot of information for this purpose.

Willing to learn new programming languages.

Enjoy reading interesting information about the latest technologies and different science research.
